DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 6/4/02. These drawings are accepted.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-13, 15, 16, and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, the recitation of "and 360° around at least some of the fasteners" is confusing. The descriptive terminology used i.e. 360° seems to be improper.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-13, 15-24, and 26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese reference 57-29718 in view of Japanese reference 4-7499.

Art Unit: 3673

Japanese '718 discloses a canal including an impermeable plastic liner (i.e. water resistant sheets) fixed to the canal via fasteners, it is inherent that the canal has a length, a bottom and first and second side walls. The sheets having a width that extends across the canal width, wherein the ends of sheets are anchored in a trench extending along both sides of the canal.

Japanese '718 does not disclose the at least one tab such that a head of a fastener is between the tab and the liner. Japanese '499 teaches that it is known to provide tabs (generally shown at 4a and 4b) on a waterproof sheet 1 wherein the head of a fastener 10 is between the tab and the liner and the sheets are capable of being heat sealed i.e. fusion welded as shown in figure 3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a tab on a waterproof sheet, as taught by Japanese '499 in order to facilitate fastening of a waterproof sheet and to ensure a "leak-proof" connection. Depending upon the size of the canal, and the size of the waterproof sheets used, it would have been an obvious matter of design choice to provide first, second, and third tabs positioned at the bottom, the first sidewall, and the second sidewall respectively, in order to line the entirety of the canal. As shown in figure 3, the liner is unpunctured since the fastener is driven through the tabs and the ends of sheet are heat welded after driving of the fasteners. Furthermore, it is apparent that liner is continuous so as to provide coverage of the whole area to be lined.

As to the method steps, it would have been an obvious matter of design choice to unroll a plastic liner in the step of placing, since it is known to roll sheets of material in

Art Unit: 3673

order to facilitate storage and handling, therefore it would be inherent to unroll the sheets of material when needed.

Allowable Subject Matter

6. Claim 25 is allowed.

Response to Arguments

7. Applicant's arguments with respect to claims 1-13, 15-24, and 26-28 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick L. Lagman whose telephone number is 703-305-7456. The examiner can normally be reached on Monday-Friday 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Schackelford can be reached on 703-308-2978. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1134.
